EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. The amendment is made to include the limitations as originally presented in claim 7, that have since been canceled and incorporated into newly submitted claims 30 and 38 . The applicant's specification provides antecedent basis for a variety of said dimensions of the conductive and phase change material in such a manner that the claimed language is encompassed by the specification, however the specification does not clearly disclose the specificity of the limitations. Therefore the examiner recommended an amendment to the specification to include the limitations, as they were originally presented.

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Appelbaum on 9/11/2008 at 516.692.8888.

The application has been amended as follows:

Please amend the specification to include the following statement at the end of paragraph [0027]:

For example, each of the intermediate conductive layers may have the same dimension as an adjacent phase change material layer.

Allowance

The following is an examiner's statement of reasons for allowance: Prior art fails to disclose or suggest a multi-bit phase change memory cell, comprising a stack of a plurality of conductive layers, wherein each of the intermediate conductive layers have the same dimensions as an adjacent phase change material layer, wherein the plurality of conductive layers are made of at least one of Cu and Pt and wherein each of the plurality of conductive layers are made of the same or a different material; and wherein each of said plurality of phase change material layers has a different height from one another and wherein the height of each of the plurality of phase change layers increases along a direction from the first outer conductor layer to the second outer conductive layer and a surface area of each of the plurality of phase change layers decreases along the direction from the first outer conductor layer to the second outer conductive layer; along with all of the other limitations, as presented in claims 30 and 38.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia A. George whose telephone number is (571) 272-5955. The examiner can normally be reached on Tue. - Fri. between 9:00 am and 5:00 pm.
